Wichtig: Montieren Sie das Nex Flex LED in eingeschalteten Zustand und immer zu zweit. So verhindern Sie Schäden, welche durch zu enge Radien beim Montieren entstehen können und irreparabel sind, wie z.B. brechen der Leiterbahnen.

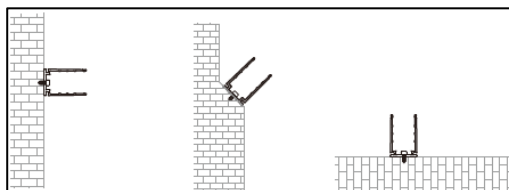

Important : Monter le Nex Flex allumé et toujours à 2. De manière à éviter les dégâts liés à une mauvaise manipulation. Comme un angle de pliage du Nex Flex trop important ou le pliage dans le mauvais sens pouvant abîmer la platine led.

Important: Mount the Nex Flex when lighted on and always by two persons. This to avoid damages due to wrong manipulation, such as too eng bend radius or wrong bending direction which can break the led plate inside the product.

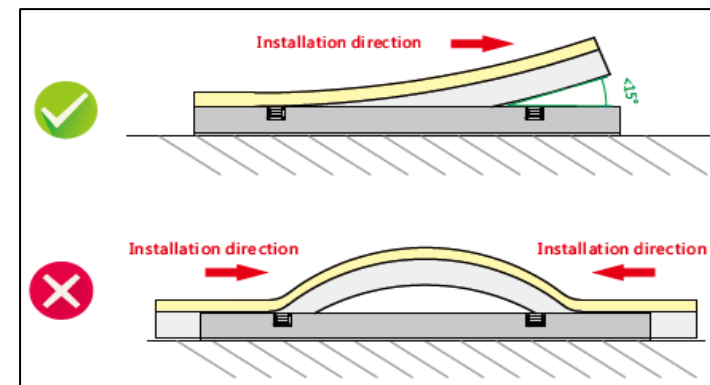

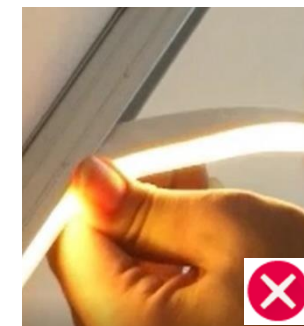

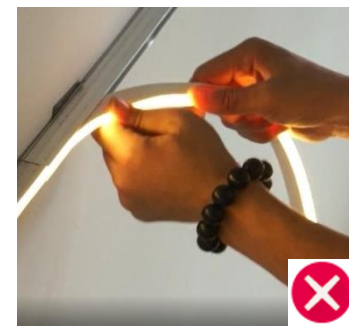

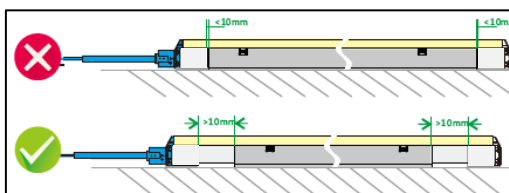

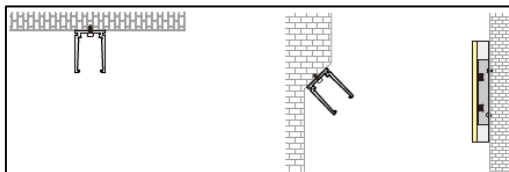

Importante: installare Nex Flex LED in modalità accesa e sempre a due. In questo modo si evitano danni che possono verificarsi a causa di diametri troppo stretti durante il montaggio e che sono irreparabili, come ad esempio la rottura degli elementi conduttori.
